American Center for Justice (ACJ) expresses its great concerns at the deterioration of the health condition of the journalist Tawfiq AL-Mansouri who has been abducted and arbitrarily detained by the Houthis for six years. Al-Mansouri

has been suffering from rheumatic heart disease, diabetes, asthma, prostate and symptoms of kidney failure because of the ill-treatment and intentional medical negligence according to his lawyer Abdulmajid Sabrah.

American Center for Justice calls the international organizations and the United Nations Envoy for Yemen to pressure the Houthis group to immediately release the journalist Al-Mansouri and three other journalists who were sentenced to death by a court run by the Houthis in order to save his life after being neglected and denied medical treatment outside the prison.
